PERSONAL SUMMARY

I thrive on solving complex challenges and exploring creative solutions with a passion for Front-End development, I can quickly transform designs to real world Full Stack projects by leveraging relevant technologies and frameworks. I also run a freelance web development service to help clients in architecting, developing, and implementing interactive websites.

SKILLS

Programming skills: JavaScript, HTML, CSS, Typescript, C/C++ (learning)

Frameworks: React JS, Next JS, Tailwind CSS, Redux Tool Kit, Material UI, Prisma, MongoDB,

Software skills: Git/GitHub, Spline, Figma, Adobe Photoshop and Premiere Pro

PROJECTS

GTA VI Countdown – Interactive countdown for GTA VI [Github](#)

Made a countdown website and integrated Gemini Flash 1.5 API to generate custom output in intel, Leonida Scoop and Weazel news

Dynamic Wedding Wish - Wedding wish website [Github](#)

A wedding anniversary wish for a client. Included music, motion and gallery features. Worked with framer motion and other technologies

Authentication System [Github](#)

Tried to build a full stack Authentication system with mongoDB in NextJS (still learning). Learning backend one day at a time, worked at this auth system, also used mongoDB Atlas in the process.

PirateHAX [Github](#)

Create a web index using LLM just for hobby. Tried HTML, CSS and vanilla JS.

EDUCATION

2020 - Dropped	R.D. National College, University of Mumbai B.M.M/ B.A.MMC	P.S- Left midway
